

I am a modern front-end web developer focused on **making beautiful, intuitive, usable, accessible, maintainable, and performant interfaces** for *all kinds* of users.

## Key Tech Skills

HTML • CSS, SCSS • SVG • JavaScript, Typescript • Accessibility, WCAG  
JAMstack • React • Angular • Git • Node • NPM • Contentful • Wordpress

## Relevant Experience

### Senior Software Engineer

Deloitte Digital • Toronto, ON • 02/2020–11/2023

- Replatformed a startup's higher education portal from Angular 1 to React (Next.js)
- Improved core web vitals on 5 landing pages for a national online insurance provider by building them as integrated static pages pulling content from a hybrid CMS
- Integrated with a national multi-brand enterprise team to quickly build a number of brand and campaign microsites
- Created component library within new Typescript monorepo & improved designer-developer collaboration
- Built responsive paired portals (admin & user) system for a new federal government digital transformation initiative in response to COVID-19 backlog, including a custom component library
- Built a JAMstack microsite guiding small business owners to find relevant COVID-19 relief programs

### Front-End Web Developer & Business Analyst

Torinit Technologies Inc. • Toronto, ON • 12/2017–7/2019

- Coordinated local design team and overseas developers to build an ERP with both web (Angular 5+, PHP/Laravel) and mobile (React Native) elements
- Conducted UX research and design for new feature development on a custom concierge platform

### Freelance & Hobby Web Developer

Toronto, ON • 2000–2017

- Designed and built: a brochure site for an exclusive dinner event series; a horse blanket inventory tracking app; an equestrian publishing site; a horse show photography display & sales site; a pet portrait artist site
